

FERTILIZER TRIALS - 1955

The continuous fertilizer trials, begun this year on the rotation and tillage field, are reported on in the section on the rotation and tillage trials.

A fertilizer trial in cooperation with the Soils Department, N D A C, was continued for the fourth consecutive year. This trial is designed to determine the utilization of moisture by small grains seeded in soil to which commercial fertilizers have been applied. Data collected on these trials have been turned over to the Soils Department N D A C.
