General

Scientific Name: Rhus typhina Family: Anacardiaceae (Cashew)

Hardiness: Zone 4 Leaves: Deciduous Plant Type: Shrub

Growth

Rate: Medium
Mature Height: >7'
Longevity: Medium
Power Line: Yes

Ornamental

Flowers: Inconspiuous Fruit: Red hairy drupe Fall Color: Red

Staghorn Sumac

Description

A large, loose, open-spreading shrub with a flattish crown and rather picturesque branches resembling the velvety antlers of a deer, hence the name staghorn. Staghorn sumac has borderline hardiness in North Dakota and may regularly freeze back in winter.

Preferences

Light: Full sun to partial shade.

Water: Slightly less drought tolerant than smooth sumac.

Soil: Adaptable to a wide variety of soil types.

Comments

Best for naturalized areas where it can be allowed to spread via suckers and form colonies. Effective for erosion control when massed on slopes or in hard-to-cover areas with poorer soils.

Can be rejuvenated by cutting the stems back to the ground in late winter.

Cutleaf varieties, including Tiger Eyes® sumac, are available and offer superb texture and better fall coloration but may be marginally hardy.
