

## Business Need

NAU Country was experiencing problems regarding sharing new ideas/problems with their employees spread out across several different locations. The client's solution is "Idea Hub", which is an online idea sharing platform that will boost the efficiency and self-service of their employees.

## Intended Solution

NAU Country proposed the Idea Hub web application to make the process for viewing and tracking ideas for the company an easier process.

## Development Phase 1

- Set up SQL Server database
- Created Blazor Server App
- Set up repository on GitHub for version control
- Authentication page
- Page to lists idea with search functions

## Development Phase 2

- Email notification service
- Reporting
- Styling the application
- Test/fix functionality
