Name *

Jason Knight

Organization (If Applicable)

H-2 Enterprises

Please describe your Agriculture and/or Extension needs and potential solution. *

ND is a hotbed of energy construction activity and has been for the last 5 years or so. ND has unique soil and environmental conditions that require a certain level of knowledge and skill to restore these job sites/projects back to original. A lot of times the knowledge to see these sites back to original or better conditions are not being used and/or met. If there was someone to help guide these processes and see them to completion there would be more follow through on these projects and most likely more success.
