Subject: Laboratory and greenhouse space for NDSU Waldron Hall replacement
Date: Monday, November 1, 2021 10:56:24 AM

As a home gardener and an NDSU Master Gardener Diagnostician, I rely on current horticulture research from NDSU Extension to make decisions about plants that are hardy and disease resistant in our area.

I have heard that the horticulture greenhouses at NDSU will be demolished and currently there are no funds to replace them. I would like to encourage the State Board of Agricultural Research and Education to prioritize including laboratory and greenhouse space to the replacement for Waldron Hall. I would also like your support for legislative funding for horticulture through the Food Security and Outdoor Space initiative.

I believe that it is important for North Dakota to invest in agriculture and horticulture. We should be as known for our agriculture and horticulture research as we are for our football team.
