Subject: Seed Cleaning plant at LREC

I'm Jon Iverson and I farm northeast of Langdon in Cavalier County. The LREC is a very valuable asset for the Langdon Area. Our growing season is so much different from any other in the state so seed production and a cleaning facility is very important to our agriculture community. With the old mill being out of date and obsolete they can not get parts for their repairs without re-fabricating their own or just not getting it fixed. Funding for a new cleaning plant would be very beneficial to the LREC and the whole northeast part of our state.

Jon Iverson
